RADIOACTIVE SANITARY SEWER DISCHARGE RECORD

Radiation Safety Office
Washington State University
Mail Code 1302

Washington State Rules and Regulations for Radiation Protection authorize discharge of certain quantities of radioactive materials to the sanitary sewerage system. *WAC* 246-221-190 specifies the requirements for such disposals. WSU's *Safety Policies and Procedures Manual (SPPM),* as approved by the Radiation Safety Committee, outlines University procedures to ensure adherence to the regulations.

"To monitor and maintain compliance with State regulations and University policies all discharges of radioactive material to the sanitary sewerage system must be documented and reported to the Radiation Safety Office for *each month* in which those discharges took place."

Complete the following discharge record monthly for the disposal of radioactive liquids to the sanitary sewerage system. These liquids must be **READILY SOLUBLE OR DISPERSIBLE IN WATER.** Liquids which are insoluble in water or exhibit hazardous characteristics are **prohibited** from discharge to the sanitary sewerage system; call EH&S for details, 335-3041).

AUTHORIZED USER	LOCATION OF DISCHARGE
DEPARTMENT	DISCHARGE MONTH/YEAR

RADIONUCLIDE (ONLY ONE RADIONUCLIDE PER RECORD)

DISPOSAL DATE (mm/dd/yy)	**TOTAL ACTIVITY*** (mCi)	**PERSON DISPOSING** (initials)

GRAND TOTAL (mCi)

USER FORM COMPLETED BY	DATE
RSO DATE ENTRY BY	DATE
